Hunterdon Health

DEAR FRIEND,

For over 70 years, Hunterdon Health has had deep roots, a proud culture of caring, and a single-minded focus on supporting families throughout their health journey. Our new name and logo acknowledges our history and embodies our legacy of caring and continued commitment to improving the health of the families who live and work in our community.

The past few years have shifted how healthcare is accessed, provided and perceived. Research tells us that our community – our patients and our 2,700 employees – think about health and wellness in a more personal way and want to play a more active role in their care. In addition, the importance of achieving health equity and closing health disparities have become core components of our mission to embrace people, elevate care, and cultivate healthier communities for all.

Achieving health equity requires removing obstacles to obtaining health services to ensure all community members have access to services and feel safe, supported, and respected when seeking healthcare. At Hunterdon Health, we have worked hard to identify and address these obstacles and will continue to do so moving forward. We are proud to offer:

- Hearing loop systems and portable devices for the hearing impaired;
- A dedicated LGBTQ+ Nurse Navigator who offers compassionate care specific to their needs;
- Financial assistance for those with limited incomes and extenuating circumstances;
- Language assistance, interpreters and educational resources for those whose primary language is not English; and
- Bilingual Community Health Workers to assist our Spanish-speaking patients navigate the healthcare system and connect them to services by providing outreach, education, cancer screenings and navigation services.

The Hunterdon Health Resource Guide is available in print and on our website to help you find all the resources for your health care needs. Our founders understood the importance of having a primary care physician and promoting health and wellness beyond the hospital. Today, we reap the benefits of their innovative approach and have built a strong network of preventive, diagnostic and therapeutic inpatient and outpatient primary and specialty care services throughout Hunterdon, Somerset, Warren, Mercer and Morris counties.

Hunterdon Health is here for you. I encourage you to call our Hunterdon Health Physician Referral Service at 1-800-511-4462 to answer any questions you may have regarding our services. Whether you are new to Hunterdon Health or an old friend, we welcome you to our family of care.

To your good health,

Patrick J. Gavin

As a vital component of that mission, we are committed to improving our diversity, equity, and inclusion (DEI) efforts not only for our employees, but also to better serve our patients as it directly affects patient health outcomes and quality of life in a profound way.

Health equity ensures that everyone has a fair and just opportunity to attain their highest level of health. We attain health equity by recognizing and addressing injustices, helping our community overcome economic, social, and other obstacles to health and health care and eliminating preventable health disparities.

Health disparities are preventable differences in the burden of disease, injury, violence, or opportunities to achieve optimal health that are experienced by those that have been disadvantaged by their social or economic status, geographic location, and environment. Populations that experience health disparities include people from some racial and ethnic minority groups, people with disabilities, women, people who are LGBTQ+ (lesbian, gay, bisexual, transgender, queer, intersex, or other), people with limited English proficiency, and other groups.

At Hunterdon Health, we continually strive to recognize and close health disparities and promote health equity and advocate for health justice. Practicing DEI will ensure the success of our mission and guarantee all of our community members have access to services and feel safe, supported, and respected when seeking healthcare.

OVERVIEW OF HUNTERDON HEALTH STAFF

Listed here are the names, addresses and telephone numbers of physicians and allied health providers on the medical staff of Hunterdon Medical Center and members of Hunterdon Health.

ACTIVE MEDICAL STAFF

Hunterdon Health's medical staff comprises over 400 physician members of the active and community active medical staff who are primary care and specialty care physicians, many of whom have offices at the Hunterdon Doctor's Office Building adjacent to the hospital and offices throughout the community. They provide outpatient and inpatient services and are the hospital's residency program faculty for training family medicine physicians.

COURTESY STAFF

Practitioners on the courtesy staff provide additional specialist and family medicine services and may provide inpatient care at Hunterdon Medical Center.

CONSULTING STAFF

Consulting staff members provide consultative services upon referral from the medical staff.

ABOUT OUR HOSPITALISTS

This program provides physicians who specialize in medical care for pediatric and adult inpatients. The hospitalist communicates with your primary care physician to ensure continuity of care and appropriate post-discharge care.

YOUR MEDICAL HOME

We believe that patients are best served by having an identified primary care physician. Your "personal physician" and their colleagues will be your Medical Home. This should be your first point of contact with the healthcare system for all your medical needs, except for emergency care. Any specialty physician should communicate their findings to your Medical Home. Your personal physician will:

- Provide follow-up care for your current condition.
- Provide continuous and comprehensive care through all stages of life.
- Be responsible for the coordination of all your care through all parts of the healthcare system.
- Direct you to the most appropriate specialists to provide that care when needed.
- Advise you when you are presented with different options for your care.
- Help to monitor all your medications to avoid interactions and duplication.
